

邵帅

(+86) 199-5215-9098 | shaos26@mails.tsinghua.edu.cn

教育背景

2026.9-至今	清华大学	软件工程	GPA - 排名 -	硕士在读
2022.9-2026.6	湖南大学	计算机科学与技术（拔尖班）	GPA 3.91 排名 1/19	工学学士

项目经历

本科优秀毕业论文 - Linux 内核中 Rust 代码的模糊测试技术研究 项目负责人 2025.9-2026.6

- **研究成果:** 基于 Syzkaller 实现 Linux 内核 Rust 模块靶向模糊测试框架, 通过 KCOV 选择性插桩与 Syzlang 协议状态建模, 生成满足角色、状态及资源依赖的 Binder 调用序列。48 小时实验中, Rust Binder 覆盖率由约 23% 提升至约 32% (相对提升约 39%); 发现并上报 1 处锁守卫生命周期相关并发缺陷, 社区已提交修复补丁, 另收集 8 个其他内核子系统的崩溃目录。

国家自然科学基金项目 - 面向光电协同智算中心网络的高性能 RDMA 协议 核心成员 2024.8-2025.6

- **项目介绍:** 国家自然科学基金项目, 围绕光电协同智算中心网络的高性能 RDMA 协议开展研究, 解决光电混合网络与 RDMA 协议融合的挑战。通过支持灵活选路、精准控速和动态错峰, 应对光电网络的小存储、少反馈和强潮汐问题, 提升传输效率, 为大型智算中心提供高效网络传输支撑。
- **负责工作:** 开展数据并行、流水线并行等模式下的光电交换机混合策略仿真实验。

云计算实验项目 - 高性能大模型推理服务系统 项目负责人 2025.3-2025.6

- **项目介绍:** 项目实现了基于 Raft 算法的分布式 KV 存储数据库, 为系统提供高可用、高一致性的底层数据存储能力, 并在此基础上, 构建了一个支持多后端大语言模型负载均衡和故障转移的 Web 聊天服务, 前端通过 Flask 后端与多个 LLM API 交互, 所有后端配置和聊天历史均通过 Raft KV 存储分布式同步, 具备高性能、高可用和易扩展等特性。
- **负责工作:** 基于 Raft 的分布式 KV 存储数据库实现、智能聊天系统的负载均衡与安全性存储。

竞赛成果

全国大学生物联网设计竞赛（全国总决赛一等奖，华中及西南赛区一等奖，广和通现金奖） 2024.7-2024.9

- **项目介绍:** 针对办公楼内文件文档处理流程效率低下的问题, 基于广和通 5G-AIoT 开发板设计一款 OA 机器人, 搭载智能路径规划算法, 实现实时定位和定时文件传送, 并且配备双重人脸识别和实时订单监控, 实现高效办公协同。
- **负责工作:** RRT*-Smart 智能规划算法设计、OCR 文字识别及人脸识别、前端 WordPress 网页设计。

其他竞赛

- 蓝桥杯软件赛 C/C++ 组省级二等奖, CCF-CSP 软件能力认证 290 分 (前 5%)
- 华数杯全国大学生数学建模竞赛省级二等奖, 全国大学生数学竞赛省级三等奖

获奖情况

- 国家奖学金 (连续三年) 2023, 2024, 2025
- 湖南大学优秀学生标兵 (湖南大学本科生最高荣誉) 2024
- 湖南省优秀本科毕业生, 湖南大学优秀本科毕业生 2026
- 湖南大学优秀学生 (连续三年), 湖南大学优秀团干 (连续三年) 2023, 2024, 2025
- 个人事迹获《光明日报》专题报道 2025

其他技能

- **英语水平:** CET-6 493 分, CET-4 559 分
- **编程技能:** C/C++, Python, Rust, Matlab, Linux, Git 等
- **个人主页:** <https://obstacle19.github.io>

Education

2026.9-Present	Tsinghua University	Software Engineering	GPA –	Rank –	Master's
2022.9-2026.6	Hunan University	Computer Science & Tech. (Honors)	GPA 3.91	Rank 1/19	B.Eng.

Projects

Outstanding Undergraduate Thesis - Fuzzing Rust in the Linux Kernel	Project Lead	2025.9-2026.6
➤ Results: Built a Syzkaller-based targeted fuzzer for Rust kernel modules, combining selective KCOV instrumentation with Syzlang protocol modeling to generate Binder calls respecting role, state and resource dependencies. In 48-hour experiments, Rust Binder coverage rose from ~23% to ~32% (~39% relative gain). Found and reported a lock-guard lifetime-related concurrency bug; the community submitted a fix. Also collected eight crash directories from other kernel subsystems.		
NSFC Project - RDMA for Optical/Electrical AI Data Center Networks	Core Member	2024.8-2025.6
➤ Overview: Studied high-performance RDMA for hybrid optical/electrical AI data center networks. Flexible routing, precise rate control and dynamic traffic staggering address limited buffering, sparse feedback and strong traffic fluctuations to improve transmission efficiency. ➤ Contributions: Simulated hybrid optical/electrical switching strategies under data and pipeline parallelism.		
Cloud Computing Project - High-Performance LLM Inference Services	Project Lead	2025.3-2025.6
➤ Overview: Built a highly available, strongly consistent Raft-based distributed key-value store and a web chat service with load balancing and failover across LLM backends. A Flask backend connects the frontend to multiple LLM APIs; backend configurations and chat histories are synchronized through Raft for performance, availability and scalability. ➤ Contributions: Implemented the Raft-based store, chat-service load balancing and secure data storage.		

Competition Achievements

National College Student IoT Design Competition	2024.7-2024.9
First Prize: National Finals & Central/Southwest Regional Contest; Fibocom Cash Award	
➤ Overview: Built an office automation robot on a Fibocom 5G-AIoT board to streamline document handling. Integrated path planning, real-time localization, scheduled delivery, dual facial recognition and real-time order monitoring for efficient office collaboration. ➤ Contributions: Designed RRT*-Smart path planning, OCR and facial recognition; built the WordPress frontend.	
Other Competitions	
➤ Lanqiao Cup (C/C++): Provincial Second Prize; CCF-CSP: 290 points (top 5%). ➤ Huashu Cup Mathematical Modeling: Provincial Second Prize; National College Mathematics Competition: Provincial Third Prize.	

Honors and Awards

➤ National Scholarship (three consecutive years)	2023, 2024, 2025
➤ Model Outstanding Student, Hunan University (highest undergraduate honor)	2024
➤ Outstanding Graduate, Hunan Province and Hunan University	2026
➤ Outstanding Student & Youth League Cadre, Hunan Univ. (three consecutive years)	2023, 2024, 2025
➤ Featured in a special report by Guangming Daily	2025

Skills and Additional Information

➤ English: CET-6: 493; CET-4: 559.
➤ Technical Skills: C/C++, Python, Rust, MATLAB, Linux, Git.
